

How to prepare a return

- Walk through the shelves of the pharmacy pulling ALL outdated material and up to 4 months in-dates products.
- State law requires that pharmaceutical inventory sheets are filled out completely. (Quantity of product, NDC#, detailed description of product, customer name, address, phone/fax#, DEA License # and state license #.) Inventory sheets should be emailed or faxed to 813.749.7123 in advance or secured to the outside of the box within an envelope. Shipments without inventory may be refused per state law. Please retain a copy of your inventory for your records.
- Place everything in a box or boxes. Be sure to carefully wrap any glass containers to prevent breakage.
- Secure each box carefully to avoid loss of merchandise. Please attach the temporary labels to the box. Shipping labels will be provided by Pharmatech Services, Inc.
- Just relax. We will have your merchandise picked up at your doorstep. It will be processed within one week and you will have a full report with results of your return within 48 hours of processing.
- Please include a copy of your DEA license and your state license with your shipment.

Thank you for your business!

Please call (813) 749-7113 with any questions.
